Start cost + 12 months running (support free for first 3 months)	
Every year after	₹57,500 – 1,14,000

Our own software vs ready-made (Petpooja etc.)

- Ready-made costs ₹25,000 – 45,000 every year with QR and WhatsApp add-ons, and needs the same equipment.
- Our own software has no yearly licence fee, is made for our restaurant, and our data stays with us.
- Billing keeps working even when the internet is down.

All prices are approximate. Internet and paper rolls are needed with any billing system.
